

# 860 PREMIUM

Sea Rib's has recently launched the super luxury Premium 860 boat; specifically for the discerning rib owner.

Designed by technical director and racing rib pilot, Gustavo Mateus, this vessel is equipped and finished to the highest standard. Based on the very successful Cabin 860 hull, this boat is capable of handling tough conditions in comfort. The sweptback centre console provides shelter for the pilot and co-pilot, who navigate and steer from bespoke Hydraulic seats. Likewise the 3 passenger banquette in the stern provides comfortable and safe seating, with additional shelter from the rib's sponsons.

Boat detailing is also of the highest caliber with mat black/grey Hypalon Neoprene GT 1670 tubes and teak decks contracting beautifully with the cream faux leather seating and chrome fittings. Also included in the price, are the transom ladder, shower, anchor & electrical windlass, sansom post, navigation lights and compass.

This boat is powered by a Yamaha F350 AETU V8 generating revs up 6000 rpm and providing a top speed of 52 knots. Performance is further enhanced with the electro-hydraulic steering and throttle controls, ensuring a smooth ride and drive even at top speeds.
